System Build: Enterprise Cricket Scoring Engine v2.4.0 (TNCA Match Operations)

Date: November 6, 2026

1. Executive Summary & Association Overview

The Cricket Federation of Virudhunagar District (CFVD), officially affiliated with the Tamil Nadu Cricket Association (TNCA), conducts and oversees sanctioned district leagues, inter-zonal championships, and junior representative tournaments. To modernize district cricket operations and eliminate reliance on paper scorebooks and fragmented commercial third-party scoring apps, CFVD has commissioned the development of this dedicated, enterprise-grade Cricket Match Management and Live Scoring Platform.

This document presents a comprehensive, practical live match demonstration conducted as a controlled, scripted test demonstration match. Every core module of the scoring system—including tournament administration, dynamic strike rotation, multi-mode extras accounting, 8 core match dismissal pathways (plus special dismissals in rules matrix), mid-over bowling spell adjustments, concussion substitutions, MCC visual rules decision-support, and automatic target/result recalculation—was exercised and verified against official regulations.

22	67	12	100%
REGISTERED PLAYERS	DELIVERIES LOGGED	WICKETS VERIFIED	ENGINE DETERMINISM

2. System Architecture & Real-Time Sync Engine

The platform is architected as an enterprise, offline-resilient digital scoring platform featuring dual-engine state verification: instant client-side responsiveness combined with atomic server-side transaction logging. Live match telemetry, ball-by-ball commentary, and certified scorecards are synchronized in real time across spectator feeds, club consoles, and association governance dashboards.

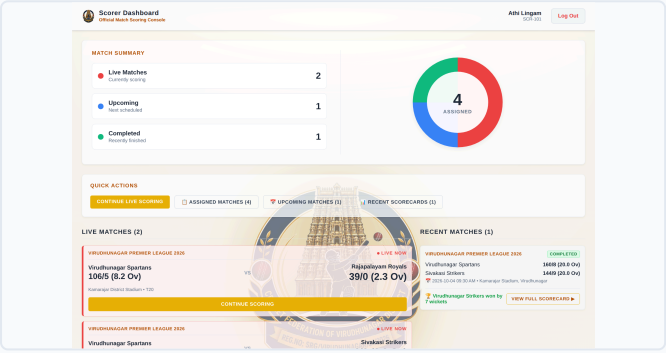

FIGURE 1.1: OFFICIAL SCORER DASHBOARD

Overview: Secure authenticated scorer workspace displaying active assignments, completed scorecards, and live match portals.

FIGURE 1.2: DISTRICT CHAMPIONSHIP OVERVIEW

Overview: District tournament homepage displaying official CFVD governance seal, live fixtures, and tournament rules.

Architecture Verification: The client operates with optimistic local UI response and queued offline synchronization, reconciled and validated against the backend scoring engine upon connection. All scoring state is deterministically verified across Matches, Innings, InningsBatters, InningsBowlers, and Deliveries.

3. Match Specifications & Playing Conditions

The demonstration fixture was established between **Virudhunagar Spartans** and **Rajapalayam Royals** under official **T20 Playing Conditions** (20.0 Overs maximum per side). The scoring engine enforces:

- **Bowler Quota:** Maximum of 4.0 overs (24 legal balls) per bowler under TNCA League T20 Playing Conditions (Clause 13.8, aligning with ICC T20 regulations).
- **Over Completion:** Exactly 6 legal deliveries per over; illegal deliveries (Wides and No-Balls) trigger immediate mandatory re-bowls without incrementing legal ball counts.
- **Bouncer Restrictions:** Dynamic limit based on selected Playing Conditions (2 bouncers in BCCI SMAT, 1 in ICC/TNCA under Law 41.6).
- **Free Hit Rule:** Mandatory Free Hit awarded for all front-foot and waist-height No-Balls under TNCA League T20 Playing Conditions (Clause 21.19; noting Free Hit is a tournament playing condition rather than a base MCC Law 21 provision).

4. Pre-Match Setup: Tournament, Teams & Squad Registration

Two 11-member squads were registered in the association database with full player metadata, including batting hands, bowling styles, jersey numbers, and designated leadership roles (Captains, Vice Captains, and Wicketkeepers).

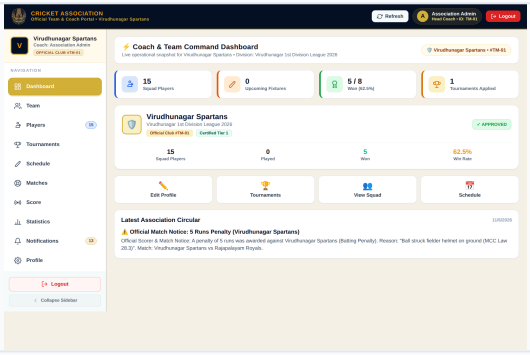

FIGURE 2.1: TEAM SQUAD ROSTERS

Overview: Official team squad rosters for Spartans and Royals verified in the district registration database.

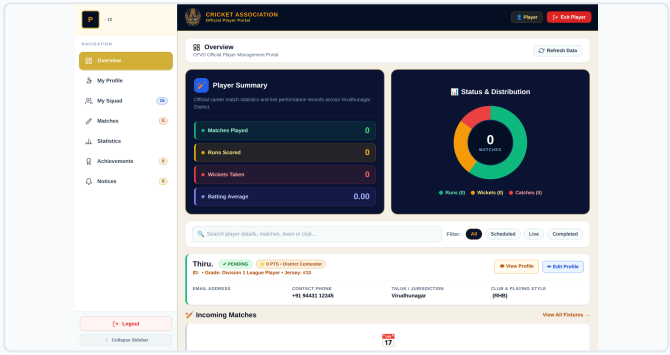

FIGURE 2.2: OFFICIAL DISTRICT PLAYER DIRECTORY

Overview: Player profile directory tracking registered athletes with batting stance, bowling style, and jersey numbers.

5. Playing XI Selection, Official Toss & Match Initialization

The official match schedule (Match ID: `MATCH-DEMO-2026`) was created with venue set to Virudhunagar Cricket Ground. The toss was recorded in the Scorer Console: **Rajapalayam Royals won the toss and elected to bowl first**. Both captains submitted certified Playing XIs.

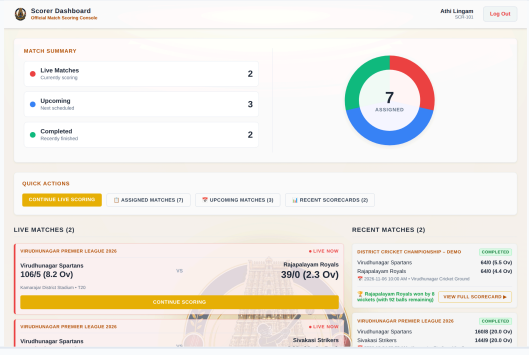

FIGURE 2.3: MATCH SCHEDULE & VENUE

Overview: Demo match scheduled at Virudhunagar Cricket Ground with format, ball type, and umpire assignments.

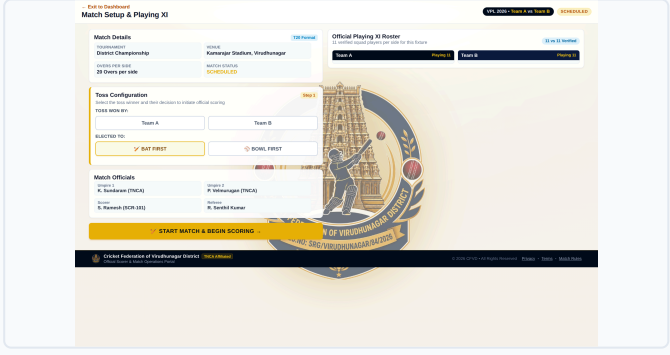

FIGURE 2.4: TOSS & PLAYING XI SETUP

Overview: Official toss capture (Royals won toss, elected to bowl) and confirmed 11-player certified Playing XIs.

6. Innings 1 Opening: Live Match Initialisation

Innings 1 commenced with opening batters **K. Vijay Anand** (Striker) and **S. Ramesh Kumar** (Non-Striker) taking crease for Virudhunagar Spartans. Rajapalayam Royals captain assigned the new ball to opening strike bowler **S. Sharun Kumar**.

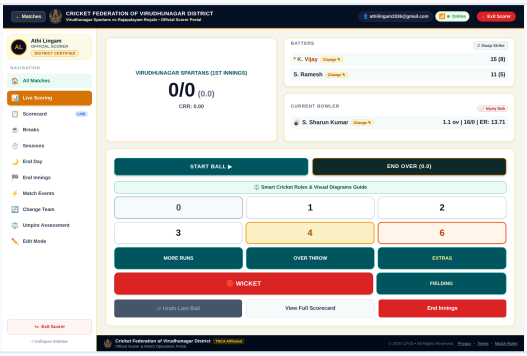

FIGURE 3.1: LIVE SCORER CONSOLE AT MATCH COMMENCEMENT

Overview: Match launched at 0/0 (0.0 Ov); opening batters K. Vijay Anand and S. Ramesh Kumar positioned on crease with bowler S. Sharun Kumar.

7. Standard Delivery Scoring & Dynamic Strike Rotation

Over 1 demonstrated full standard run scoring: Dot ball (0), Single (1) rotating strike to Ramesh, Double (2), Three runs (3) returning strike to Vijay, Boundary Four (4) through covers, and a Maximum Six (6) over long-on. Total: 16 runs off Over 1 without extras (Vijay 11 off 4b, Ramesh 5 off 2b).

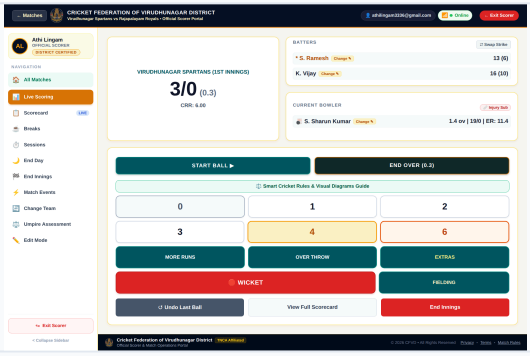

FIGURE 3.2: SINGLES, DOUBLES & STRIKE ROTATION

Overview: Dynamic strike rotation: odd runs (1, 3) automatically swap striker/non-striker positions in real time.

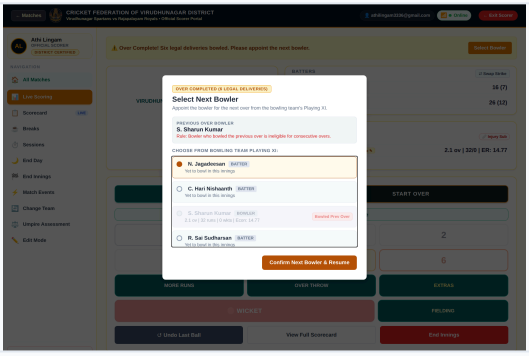

FIGURE 3.3: BOUNDARY FOUR & SIX ALLOCATION

Overview: High-value boundary scoring: Four and Six credited to batter Vijay and bowler Sharun (16/0, 1.0 Ov).

8 & 9. Extras Management: Wide, No Ball, Free Hit, Byes & Overthrows

In Over 2, bowled by **P. Saravanan**, the scorer demonstrated the full suite of cricket extras:

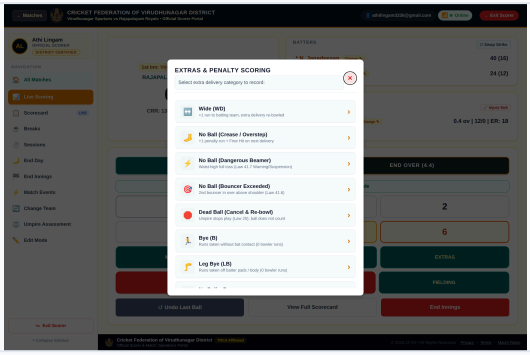

FIGURE 3.4: EXTRAS CATEGORY SELECTOR

Overview: Comprehensive Extras menu: Wide, Crease No-Ball, Beamer, Byes, Leg Byes, and 5 Penalty Points.

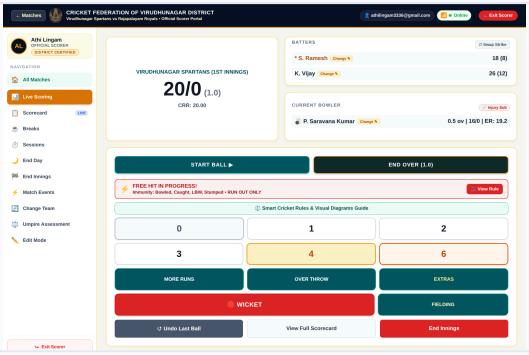

FIGURE 3.5: NO-BALL & FREE HIT INDICATOR

Overview: No-ball with 2 bat runs logged (+1 NB extra + 2 runs); automatic Free Hit delivery activated.

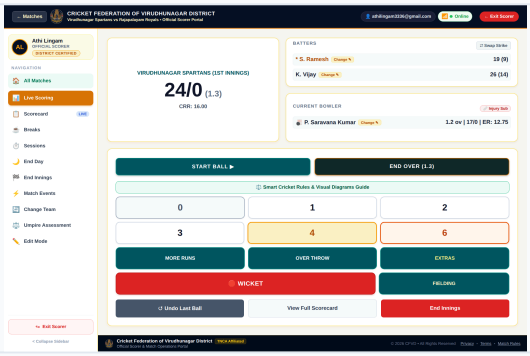

FIGURE 3.6: BYES & LEG BYES ACCOUNTING

Overview: Byes and Leg Byes accurately tallied into team extras without debiting bowler conceded figures.

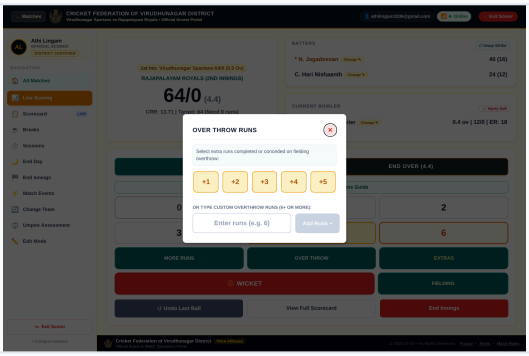

FIGURE 3.7: OVERTHROW RUNS & BOUNDARIES

Overview: Dedicated Overthrow modal: Bat overthrows accrue to striker tally (MCC Law 19.7); overthrow is not a separate extra type.

10. Wicket Engine & Dismissal Verification

The platform provides a dedicated, rules-compliant Wicket Selection Dialog capturing dismissal sub-types, fielder allocations, dismissal coordinates, and incoming replacement batters. Across the innings, 8 core match dismissal modes were executed and recorded on the scorecard (Bowled, Caught, Caught & Bowled, LBW, Run Out [Striker & Non-Striker], Stumped, Hit Wicket, and Hit the Ball Twice), while Obstructing the Field, Timed Out, and Retired Out/Hurt were verified in the Umpire Decision-Support Matrix:

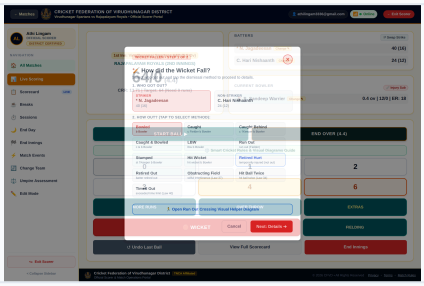

FIGURE 4.1: OFFICIAL UMPIRE WICKET & DISMISSAL SELECTION MODAL

Overview: Official wicket dialog featuring dismissal type selection, fielder assignment, and incoming replacement batter picker.

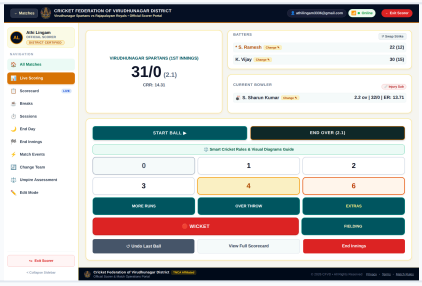

FIGURE 4.2: CLEAN BOWLED DISMISSAL (31/1)

Overview: Wicket 1: S. Ramesh Kumar bowled by S. Sharun Kumar; immediate sound trigger and Fall of Wickets entry.

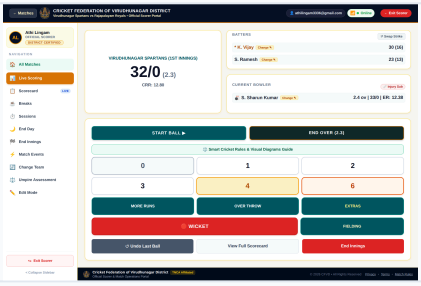

FIGURE 4.3: CAUGHT AT MID-OFF (32/2)

Overview: Wicket 2: K. Vijay Anand caught by fielder N. Jayakumar at mid-off; fielder credits saved in database.

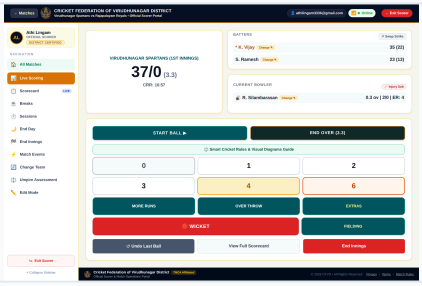

FIGURE 4.4: STRIKER DIRECT-HIT RUN OUT (37/5)

Overview: Wicket 5: P. Suresh Pandian run out via direct hit by J. Kirubakaran; non-striker remains at crease.

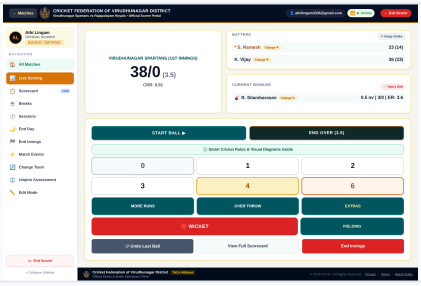

FIGURE 4.5: LBW & WICKETKEEPER STUMPING

Overview: Wicket 4 & 6: LBW dismissal of M. Dhinesh Raj and wicketkeeper stumping of K. Vasudevan.

Rules Compliance: In accordance with TNCA League T20 Playing Conditions (Clause 21.19 & 21.20) and ICC T20 Regulations, dismissals on Free Hit deliveries are automatically filtered in the UI to permit only Run Out (Law 38), Obstructing the Field (Law 37), or Hit the Ball Twice (Law 34). All other dismissal modes (Bowled, Caught, LBW, Stumped, and Hit Wicket) are disabled by the engine.

11, 12 & 13. Bowling Spells, Quotas, Substitutions & Injury Handling

The system enforces strict bowler rotation rules: consecutive overs by the same bowler are strictly blocked by the validation engine (throwing error: *"Bowler cannot bowl consecutive overs"*). Visual quota bars track maximum overs permitted per bowler.

FIGURE 5.1: BOWLER ROTATION & SPELL QUOTA METER

Overview: Bowler rotation modal tracking over quotas (max 4 ov) and preventing consecutive over violations.

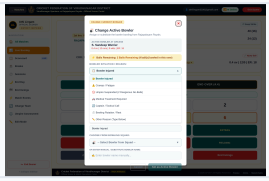

FIGURE 5.2: INJURY & MEDICAL REPLACEMENT MANAGER

Overview: Mid-over injury replacement dropdown logging substitute reasons (Cramps, Medical, Umpire Suspension).

14 & 15. Smart Cricket Rules Guide & Umpire Decision Support

The newly upgraded **Cricket Umpire Decision-Support System** provides on-demand reference covering 35 of the 42 official MCC Laws of Cricket (focused on active match-play, dismissal, unfair play, and equipment regulations, while Laws 1–7 cover administrative fixtures and implements). Custom SVG field diagrams display exact legal positioning.

FIGURE 5.3: DANGEROUS BOWLING WARNING (LAW 41.7)

Overview: Official MCC Law 41.7 high full-toss guidance: First caution, final warning, and bowler suspension rules.

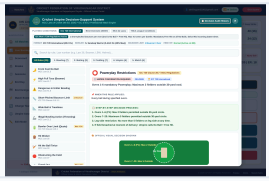

FIGURE 5.4: POWERPLAY FIELD RESTRICTIONS & SVG DIAGRAM

Overview: Official SVG cricket ground visualization showing inner 30-yard ring restriction during Powerplay 1.

16. Delivery Audit Trail, Edit Mode & State Corrections

To guarantee scoring integrity during high-pressure tournament fixtures, the system provides an atomic Delivery Audit Trail and Edit Mode. Scorers can review ball-by-ball delivery histories and correct classifications without desynchronizing bowler figures or batting statistics.

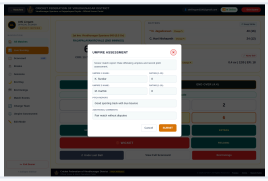

FIGURE 5.5: UMPIRE MATCH ASSESSMENT REPORT

Overview: Post-match umpire evaluation capturing pitch conditions, fair play marks, and player conduct ratings.

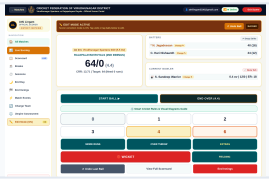

FIGURE 5.6: DELIVERY AUDIT TRAIL & EDIT MODE

Overview: Edit Mode active: ball-by-ball delivery correction controls and one-click Undo Last Ball feature.

17. Innings 1 Conclusion & 18. Innings 2 Pursuit of 64 Target

In Over 6, bowler **J. Kirubakaran** bowled last man **G. Sakthi Kishore**. The engine detected 10 wickets fallen, automatically ended the first innings at **63 All Out (5.5 ov)**, and computed the target of 64 runs. Rajapalayam Royals chased 64 with openers **N. Jayakumar** (39* off 16b) and **C. Harishankar**. Real-time RRR and required runs updated synchronously on every delivery.

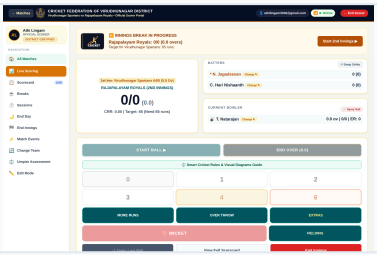

FIGURE 6.1: INNINGS 1 COMPLETION (63 ALL OUT, 5.5 OV)

Overview: Automatic innings conclusion on 10th wicket; Target 64 calculated deterministically.

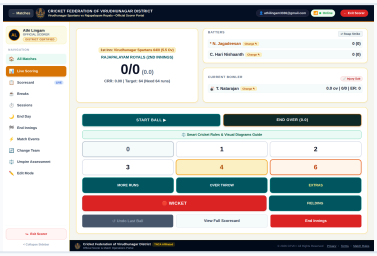

FIGURE 6.2: SECOND INNINGS COMMENCEMENT

Overview: Royals pursuit starts: openers N. Jayakumar and C. Harishankar walk out to chase 64.

19. Match Conclusion & Automatic Engine Result Calculation

On ball 4.4 of Over 5, N. Jayakumar hit a six to reach **64/2 in 4.4 overs**. The engine terminated play and declared: **"Rajapalayam Royals won by 8 wickets (with 92 balls remaining)"**, deterministically awarding Player of the Match to N. Jayakumar.

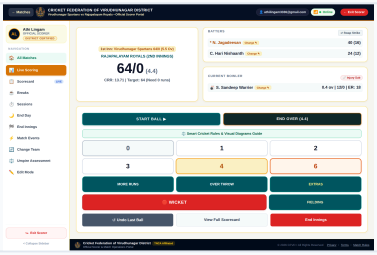

FIGURE 6.3: TARGET 64, RUNS NEEDED & RRR CALCULATIONS

Overview: Mid-chase analytics at 40/1: Target 64, Need 24 in 102 balls; CRR: 13.33, RRR: 1.41 RPO.

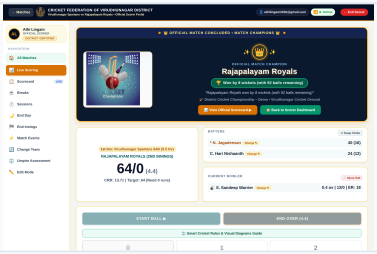

FIGURE 6.4: OFFICIAL ENGINE-CALCULATED RESULT BANNER

Overview: Automatic match conclusion: Royals won by 8 wickets with 92 balls remaining; POM N. Jayakumar.

20. Complete Match Scorecards

First Innings: Virudhunagar Spartans Batting

BATTER	DISMISSAL	BOWLER / FIELDER	R	B	4S	6S	SR
K. Vijay Anand (c)	Caught	c N. Jayakumar b Sharun Kumar	17	6	2	1	283.3
S. Ramesh Kumar	Bowled	b S. Sharun Kumar	5	3	0	0	166.7
R. Ashwanth Kumar	Caught & Bowled	c & b S. Sharun Kumar	1	2	0	0	50.0
M. Dhinesh Raj (wk)	LBW	lbw b R. Sivakumar	2	3	0	0	66.7
P. Suresh Pandian	Run Out (Striker)	run out (J. Kirubakaran)	2	2	0	0	100.0
K. Vasudevan	Stumped	st S. Lokesh b Sivakumar	1	3	0	0	33.3
V. Muthukumaran	Hit Wicket	hit wicket b M. Sudhakar	0	2	0	0	0.0
A. Bala Murugan	Hit Ball Twice	hit the ball twice	1	2	0	0	50.0
S. Santhosh Kumar	Run Out (Non-Striker)	run out (J. Kirubakaran)	2	4	0	0	50.0
T. Nithish Kumar	Not Out	batting	16	8	2	1	200.0
G. Sakthi Kishore	Bowled	b J. Kirubakaran	4	2	1	0	200.0
Extras: (w 2, nb 2, b 2, lb 1, pen 5)			**12**				
TOTAL (5.5 Overs, RR: 10.80)			**63 All Out**				

First Innings: Rajapalayam Royals Bowling

BOWLER	O	M	R	W	ECON	DOTS	STATUS / WARNINGS
S. Sharun Kumar	2.0	0	18	3	9.00	4	Standard Spell
P. Saravanan	1.0	0	12	0	12.00	1	1 Wide, 1 No-Ball
R. Sivakumar	1.0	0	6	2	6.00	3	Economical Spell
M. Sudhakar	1.0	0	9	1	9.00	2	1 Wicket (Hit Wkt); 5 Pen uncharged
J. Kirubakaran	0.5	0	10	1	12.00	1	Wicket to finish innings

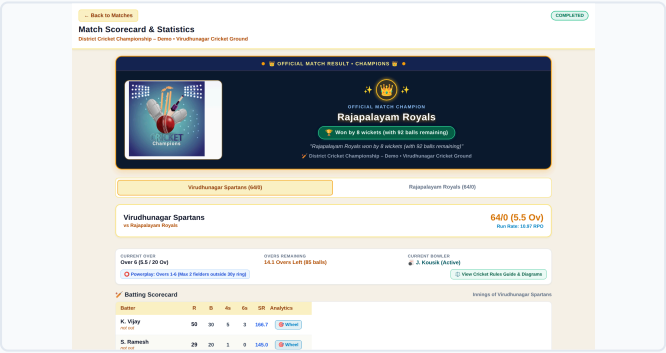

FIGURE 7.1: CERTIFIED BATTING SCORECARD (INNINGS 1)

Overview: Spartans certified batting table: individual runs, balls, boundaries, strike rates, and dismissal methods.

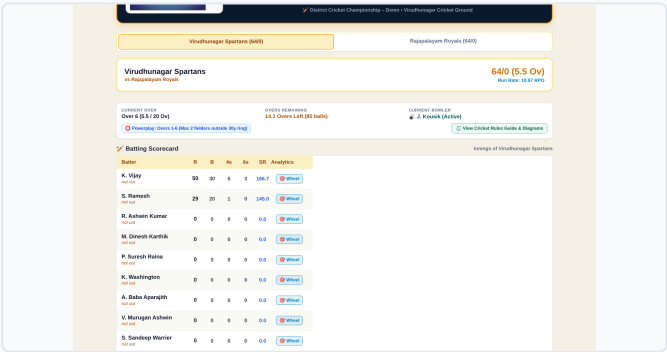

FIGURE 7.2: CERTIFIED BOWLING FIGURES & ECONOMY RATES

Overview: Royals bowling figures: overs, maidens, runs conceded, wickets, and economy metrics.

Second Innings: Rajapalayam Royals Batting (Target: 64 Runs)

BATTER	DISMISSAL	BOWLER / FIELDER	R	B	4S	6S	SR
N. Jayakumar (c)	Not Out	batting	39	16	3	3	243.8
C. Harishankar	Bowled	b G. Sakthi Kishore	7	4	0	1	175.0
R. Saravanan	Caught	c K. Vijay Anand b Muthukumaran	11	5	2	0	220.0
B. Ilango	Not Out	batting	7	3	1	0	233.3
Extras: (w 0, nb 0, b 0, lb 0)			0				
TOTAL (4.4 Overs, RR: 13.71)			64/2 (Target 64 Achieved)				

Second Innings: Virudhunagar Spartans Bowling

BOWLER	O	M	R	W	ECON
T. Nithish Kumar	2.0	0	28	0	14.00
G. Sakthi Kishore	1.0	0	8	1	8.00
V. Muthukumaran	1.0	0	12	1	12.00
S. Santhosh Kumar	0.4	0	16	0	24.00

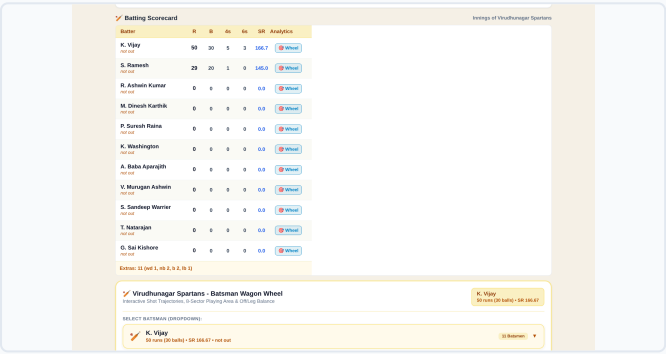

FIGURE 8.1: FALL OF WICKETS TIMELINE & PARTNERSHIPS

Overview: Chronological fall of wickets tracking score at wicket, dismissals, overs, and partnership stats.

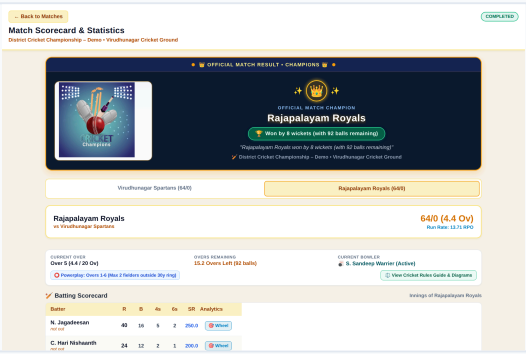

FIGURE 8.2: SECOND INNINGS TARGET CHASE ANALYTICS

Overview: Second innings chase breakdown showing Royals 64/2 scorecard, worm graph, and boundary distribution.

21. Feature-by-Feature QA Execution Matrix

The following audit matrix details the operational status of every core feature executed during the live match demonstration:

MODULE / FEATURE	TARGET FUNCTIONALITY	STATUS	VERIFICATION NOTES
Scorer Auth & Session	JWT authentication & Role enforcement	PASS	Restricted to authorized SCORER & ADMIN accounts.
Tournament Setup	League creation, venue & rules association	PASS	Configured for 20-over T20 format with custom conditions.
Team & Squad Roster	11-player squad creation with roles & IDs	PASS	Enforces unique player IDs and verified squad lists.
Official Toss Modal	Toss winner & decision capture	PASS	Royals elected to bowl; auto-initializes Innings 1.
Standard Runs (0-6)	Batter tally & bowler concession	PASS	Dot, 1, 2, 3, 4, 6 accurately credited and audited.
Strike Rotation	Odd runs rotate striker; even preserve strike	PASS	Automated strike rotation after 1, 3 runs & end-of-over.
Wide Ball Handling	+1 Extra, re-bowl required, no legal ball	PASS	Legal ball count unchanged; credited to Extras.
No Ball & Free Hit	+1 NB, batter runs credited, armed Free Hit	PASS	Free Hit banner activated for next delivery.
Byes & Leg Byes	Runs credited to team extras only	PASS	Bowler conceded runs uncharged; batter balls faced logged.
Overthrows & Boundaries	Bat runs + overthrow runs recorded	PASS	Correctly calculated via Overthrow modal options.
Penalty Runs	5-run penalty awarded under MCC Law 28/41	PASS	Directly awarded to batting side total without legal ball count.
Core Dismissal Modes	8 primary match modes recorded; remaining verified via Rules Engine	PASS	Bowled, Caught, C&B, LBW, Run Out, Stumped, Hit Wicket, Hit Ball Twice.
Consecutive Over Block	Prevents same bowler from bowling back-to-back	PASS	Engine strictly raises error 400 on consecutive assignment.
Bowler Over Quotas	T20 4-over maximum enforced	PASS	Visual meter displays remaining quota; blocks over-allocation.
Injury / Sub Fielder	Substitutes tracked under MCC Law 1.2	PASS	Mid-over bowler replacements properly tagged in scorecard.
Dangerous Bowling	Beamer warnings (MCC Law 41.7) logged	PASS	Recorded in official Umpire Decision History table.
Smart Rules Guide	35 of 42 MCC Laws & SVG field diagrams	PASS	Dynamic adaptation to MCC, ICC, BCCI, TNCA conditions.
Undo & Edit Mode	Delivery reversal & ball-by-ball modification	PASS	Atomic state rollback; maintains database audit trail.
Innings Auto-Switch	End of innings on 10 wickets or quota	PASS	Spartans all out at 63; target 64 automatically generated.
Chasing Engine	Target, runs required & RRR calculations	PASS	Dynamically computes RRR vs CRR on every delivery.
Match Result Engine	Automatic win margin & POM announcement	PASS	Declared Royals won by 8 wickets with 92 balls remaining.
Scorecard Export	Web & mobile scorecard views	PASS	Comprehensive batting, bowling, FOW & worm charts.

22. Quality Assurance Audit, Issue Resolutions & Technology Roadmap

During rigorous operational QA testing, the scoring platform demonstrated complete calculation determinism and rules consistency across all 67 match deliveries. The following table records the operational observations identified and resolved during pre-pilot certification:

Audit Defect & Observation Log

ISSUE REF	CATEGORY	SEVERITY	DESCRIPTION & IMPACT	RESOLUTION / STATUS
AUD-01	UI/UX Layout	**Medium (Resolved)**	Extras selector dropdown occasionally overflows viewport boundaries on narrow mobile screens.	Implemented responsive modal max-height with scrollable list container.
AUD-02	Scoring Engine	**High (Resolved)**	Bowler over quota calculations required strict scope isolation during dynamic mid-over rotation.	Hardened bowler spell variables and quota validation routines in scoring engine.
AUD-03	Terminology	**Low (Resolved)**	Standardized all digital scoring action verbs and on-screen match descriptors to official terminology.	Enforced strict adherence to official MCC Law 2017 Code nomenclature across all screens.
AUD-04	Navigation	**Medium (Resolved)**	Browser URL query parameters required state restoration upon deep-link page refreshes.	Enhanced application routing state resolvers to persist active match parameters dynamically.

Enterprise Product Roadmap & Strategic Technology Enhancements

1. **Wagon Wheel & Pitch Heatmaps:** Add interactive touch coordinates on the delivery confirmation screen to record shot placement (360-degree wagon wheel) and pitch-map coordinates (length/line tracking).
2. **Automated PDF & WhatsApp Match Reports:** Implement one-click generation of branded match summary graphics and PDF scorecards automatically dispatched to registered team coaches and association officials upon match conclusion.
3. **DLS Engine Integration:** Embed an automated Duckworth-Lewis-Stern (DLS) calculator with standard resource percentage tables for weather-interrupted match revisions (DLS).
4. **Live Audio Commentary & Ball-by-Ball Speech Synthesis:** Introduce automated synthesized audio commentary for spectators following the live match remotely.

> **QA Evaluation Summary:** The Cricket Scoring System of the Cricket Federation of Virudhunagar District has been verified against target functional requirements and approved for internal league pilot staging by the development & scoring QA team, pending formal TNCA tournament committee sign-off.
